Summary

Experienced **Product Specialist/Business Analyst** with **8+** years of industry experience in multiple domains like **Retail-Supply Chain, Staffing & Recruitment, and Audit Tax & Advisory**. Proven expertise in requirement gathering, user story creation, and process mapping to drive successful project outcomes. Proficient in both **Agile** and **Waterfall** methodologies, ensuring seamless collaboration between clients, development, and testing teams. Skilled **Supply Chain Management** (SCM) testing, with a strong focus on validating functionalities and resolving issues effectively. Adept at bridging the gap between technical and business teams while delivering high-quality solutions and facilitating smooth end-user adoption through training and comprehensive documentation.

Professional Experience

Tata Consultancy Services (July 2017 – Present)

Engagements	Responsibilities
Client: An Irish retail company **Location**: Kolkata **Role**: Product Specialist/ Product Owner **Duration:** June'24 – Present	• Plan and execute functional and integration testing for Blue Yonder WMS, RMS, and 3PL flows (BY TMS, PIAT) coordinate SIT, regression, and UAT with cross-functional teams. • Drive defect triage and change management with engineering and operations to ensure timely, high-quality releases. • Facilitate end-user training and publish SOPs/knowledge articles to support smooth adoption.
Client: Multinational information technology and network solutions company (Japan) **Location**: Kolkata **Role**: SCM Consultant **Duration:** Jan'24 – May'24	• Reconciled SAC dashboards and S/4HANA reports to business rules, validated SCM process data paths end-to-end. • Executed SIT and E2E testing; logged, prioritized, and tracked defects in SAP Solution Manager (SolMan). • Collaborated with development to resolve issues impacting supply chain workflows and reporting accuracy.
Client: Global workforce solutions company (USA) **Location**: Kolkata **Role**: Business Analyst / QA Test Lead **Duration:** July'19 – Dec'23	• Elicited requirements, authored user stories, and designed process flow to streamline delivery across regions. • Built RTMs and ensured alignment of epics, changes, and defects; verified fixes and supported signoffs. • Managed QA cycles (SIT, regression, UAT) in Azure DevOps, delivered training and documentation for end users. • Worked with SQL Server-backed systems, coordinated with engineering to reduce rework and cycle time.

Client: One of the BIG 4 (Netherlands) **Location**: Kolkata **Role**: QA Test Engineer **Duration:** July'17 – June'19	• Developed test plans, strategies, and effort estimates within Agile frameworks for web, desktop, and mobile applications. • Authored and executed test cases; managed smoke, SIT, regression, E2E, and UAT cycles in Jira. • Partnered with developers for defect reproduction and resolution; worked with SQL Server data for validation.
